

ACI LSX Panel Kit

ACI are now producing aluminum sub-panel kits to fit the molded fiberglass LSX Instrument Panel. There are 5 sub-panels including the center avionics section.

The panels now are unpainted. Current production provides for turbo instrumentation, Dynon D-180, (or Skyview on request) Garmin 695/696 etc. ACI will mount your Dynon tray. (Vhf and transponder trays are not installed.) ACI install the brackets to mount the Garmin GPS, Dynon remote compass and radio trays. All mounting holes are CNC or laser cut and drilled for instruments and switches. Mounting screws are supplied in the kit. (The kit is designed for a 914 or 912

Pricing is based on pre-payment by check. PayPal available @ 4% surcharge. 914 panel: US\$720 plus packaging and drop-shipping from ACI.

The builder is responsible for preparing the fibreglass LSX Instrument Panel for mounting the sub-panels. Panel modifications start at \$138 per panel.
